Austria 1947 – 2017 Israel

The story of 5500 Jews fleeing across the Austrian Alps (Krimml Tauern Pass, 2634m) on their way to Palestine did not end in 1947. It was rather a beginning. After all, the creation of the State of Israel followed merely one year later.

In 2017 Alpine Peace Crossing (APC) has staged a series of major events, thereby commemorating this flight which took place 70 years ago and highlighting the creative power of this historic moment. Migration and flight, both bear an enormous potential of regeneration, renewal and growth - for all generations. Meeting the enormous challenges of migration and escape is a task for all of us – that is the deep conviction of APC and its many prominent supporters.

This ceremony – which takes place in cooperation between the Austrian Embassy in Israel and Alpine Peace Crossing – is a testimonial to a lively culture of remembrance, sensitizing to the needs of displaced persons all around the globe!
